

Air one is one of the two Christian radio stations I listen to. This station played a significant role in ministering the gospel to me as a new believer who needed guidance and support in my new faith. My life has been dramatically transformed i.e. I am no longer dependant on alcohol to function in life, but I do not drink at all anymore and do not miss it; I have met new Christian friends; God is transforming my character in order to have strong lasting relationships (This is only a few examples). It has been 5 years since my new found faith, and I have been growing closer to the Lord daily which Air One plays a big part in ministering to me even while I am on the road. I can be having the roughest day but when I turn on the radio, there can be just the message I needed to encourage me.

If air1 is no longer played in our community, there would be a major positive influence missing in the lives of hundreds of people. Air1 is a huge blessing in that it is a radio station that is clean not only for me but for children. The music played sends positive messages to kids and adults. Music is powerful! and this radio stations sends uplifting messages to people all over the world!!

This Air1 station is a light in many people lives who are experiencing only darkness. This station might be the only spark of hope they see and has the power to transform lives with the messages that it carries i.e. "We were meant to live for so much more" by Switchfoot which has made it onto mainstream radio stations!! (It did for me) I even introduce Air1 to a boy that I am mentoring and he loves it. He now is listening to the music of Air1 instead of the rap music that sings about sex and going to house parties. Literally, the lyrics to one of the songs he got exposed to is "let's get in the back seat and f..." Now he listens to music that speaks to him the message that he is not alone, his life his precious etc, in the form that he likes.

Thankyou for taking the time to read my comment...Many Blessings,

Christa Frost
